The need for a cost-effective and comprehensive testing solution

As the world moves to the next stage of COVID-19 pandemic, it becomes crucial for insurers to reduce their IT and operations cost. Insurance is a data-sensitive, and time-sensitive sector that involves exhaustive testing and requires a test automation solution that can deliver error-free recurring testing every single time at a reasonable cost.

Whether you’re already live on Guidewire applications or are working on your first core transformation to Guidewire, a tailor-made but comprehensive testing solution that covers a full development lifecycle is a necessity. With our new Testing model, you can achieve this at a reduced cost across the Insurance value chain.
Zensar’s Guidewire-enabled Testing as a Service (TaaS)

Zensar’s Guidewire Testing along with its people, process, tools, accelerators and technology will now be delivered as a service, that will help you in meeting high-quality standards while reducing your costs and time to market. With the effective deployment of resources, we ensure immediate resource readiness, thus a faster time to market and with a consumption-based service fee, we reduce your costs.

With the ongoing coronavirus pandemic, Insurers globally are grappling with changing landscape and an uncertain future. Currently, insurer’s priority is to meet increasing cost pressure, ensure business continuity and maintain operational readiness. Our testing as a service solution will help them meet their goals with Functional, performance and security testing services.

Testing as a Service Model

**What makes Zensar’s Testing as a Service unique?**

- On-demand testing services to tailor-made for business continuity and shifting priorities for customers
- Unit-based pricing and test delivery to support aggressive cost reductions while continuing to deliver test units
- Test delivery from anywhere to support unprecedented situations like COVID-19

**Zensar’s Guidewire Testing with One Touch**

Our experts have developed Guidewire test automation framework as part of Zensar’s unified test automation platform – One Touch, which is a Behavior driven development automation platform that enables continuous testing processes, speeding up implementation without compromising on quality.

What all does the Guidewire Testing as a Service comprise of?

- Manual Testing
- Automation Testing
- Data Testing
- Performance Testing

Our testing as a service model makes effective use of resources ensuring immediate resource readiness for our clients while reducing cost by deploying a consumption-based service fee with pay for use model.

Zensar’s Test Automation Implementation

A customer focused Testing framework implementation will vary across insurers. A testing journey, custom-selected as per business goals, can help ensure successful implementation and measurable outcomes.

We provide customized test reports based on your specific requirements:

- Author Test Scripts
- Create Traceability matrix
- Test Execution
- Defect management
- Report Results

Test Automation Implementation journey

1. Analysis of Manual Test Suite
2. Test Case Optimisation
3. MAP to reusable assets and gap Analysis
4. Customise reusable assets
5. Validate workflow with reusable assets
6. Rollout for Automation
Key Business benefits of Testing as a service

The TaaS model enabled with our unique One Touch testing solution, and Test Automation framework is also one step in that direction. Our offering will help insurers save cost and efforts in testing while providing exhaustive coverage and quality.

| 40% reduction in time to market | 40% lower testing cost | Immediate resources and delivery readiness | Business continuity with ‘Test from Anywhere’ |
